

Learn More About the Study!

Broadway between I-25 and Highlands Ranch Parkway is a vibrant corridor where people live, work, eat, and shop. This 11-mile stretch of Broadway provides local and regional connections through the City and County of Denver, Arapahoe County, cities of Englewood, Littleton, and Centennial, and Douglas County. The City of Littleton is partnering with these agencies to study the transportation and land use conditions along this section of Broadway.

The study will examine existing conditions and future conditions for the different character areas along the corridor.

KEY CONSIDERATIONS

- Transportation
- Land Use
- Economics

The study will include development and evaluation of alternatives based on a consideration of existing and future conditions, roadway geometry, residential and business access, traffic flow, environmental factors, the location of communities and other developed areas, and community and agency plans and input.

STUDY PHASES

CORRIDOR CONDITIONS ASSESSMENT

The study team will collect data and study corridor conditions, especially its role for people living and working along the corridor.

2 CORRIDOR VISIONING

The study team will generate a cohesive vision for the corridor and establish the goals and objectives for changes along it.

IMPROVEMENT PLAN

The study team will generate ideas to achieve the vision and goals for the corridor through physical infrastructure enhancements, policy changes, or other strategies to catalyze improvements.

CONCEPTUAL
DESIGN AND/OR
EARLY ACTIONS

The study team will further develop the best ideas and create conceptual designs for them, or even begin implementation.

DRAFT STUDY GOALS

The following goals represent the desired outcomes for the proposed improvements to the corridor.

SAFETY

A

Attaining a future with zero transportationrelated fatalities and serious injuries.

CONNECTIVITY

Completing
a cohesive and
well-connected
corridor for all
modes and users.

MOBILITY

Offering reliable and predictable transportation options.

PLACEMAKING

Creating spaces where people want to spend time.

ECONOMIC DEVELOPMENT

Fostering investment that positively impacts the community.

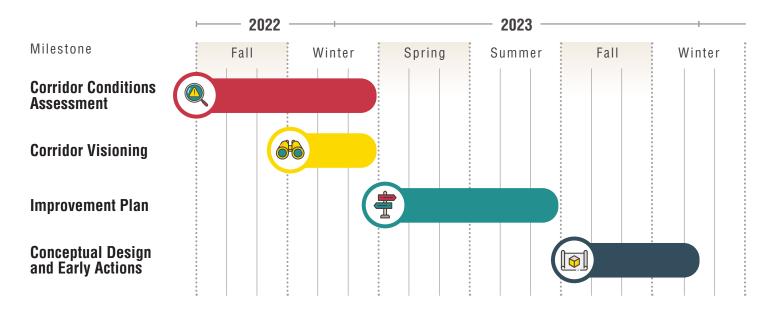

SUSTAINABILITY

Maintaining and enhancing ecological, human, and economic health.

SCHEDULE

The study will conclude in December 2023, when the team will present findings and share the next steps for implementing construction. Funding for improvements has yet to be identified.
